

Green500 Masterclass

Energy Monitoring and Targeting Workshop

Date: Thursday, July 24th, 2008

Time: 3 to 5 pm

Location John Laing
Allington House
150 Victoria Street
London
SW1E 5LB

Target Audience and Content

This masterclass is suitable for all building managers and occupiers with responsibility for energy management. No prior technical knowledge is required.

The session will cover:

- Background to energy M&T, why it is important and typical savings
- Metering legislative requirements
- Overview of metering methods and technologies
- Data analysis and reporting techniques
- Setting energy targets
- Setting up a M&T system
- Sources of further information

The session will include worked examples and practical experience of interpreting energy data. The session will be approximately 2 hours in duration.

Where available, delegates should bring along examples of energy data from their sites. However, this is not necessary to gain a full understanding from the session.

Registration

To register, please contact Amy Williams at Amy.Williams@aeat.co.uk. Attendance is limited to 20 delegates.

Presenter – Kate Dapre

Kate is an energy consultant with over 11 years experience in consultancy to public and private sector, project management, research and development, and training. She is currently Project Officer for the Building Regulations Research Programme (BRRP), run by the Department for Communities and Local Government (DCLG), and this involves monitoring research project progress, evaluating reports and proposals, facilitating dissemination of findings and advising DCLG on research strategy. In a previous role, Kate was involved in the delivery of energy management services to Oxfordshire County Council. This included the provision of energy advice and energy awareness training to building managers across the council's property portfolio, including schools and offices. Kate was also a senior lecturer at Oxford Brookes University for a number of years and undertook training and education courses for undergraduates, postgraduates and professionals undergoing CPD.
